Demo Lab DE - charts.html reference

Source: supplied charts.html sample arrays (not measured vehicle data).

Power: PS | Torque: kg-m | Display: RPM x 1000

X: 2500-7500 RPM, step 500 RPM

Power axis: 0-600, step 50 | Torque axis: 0-70, step 10

Four curves; 89 original points; independent RPM sampling preserved.

Run 1 Power	546.62 PS @ 6820 RPM
Run 2 Power	515.84 PS @ 6740 RPM
Run 1 Torque	65.04 kg-m @ 4800 RPM
Run 2 Torque	60.00 kg-m @ 5100 RPM

Run 2 torque peaks at 60.00 at both 5100 and 5350 RPM.
The first peak RPM is shown. The source static legend says 59.26;
this report uses actual sample values instead of the inconsistent legend.

MOCK ONLY: not a measured performance result, certification or quotation.
Demo price: CNY 12,999. All four report tabs use the supplied sample curves.
